## Who we are

### Technical industrial supplies

Sabafer Srl is a company with thirty years of experience in the techno-industrial supply market.

Based in Turin, a few kilometers away from the major industrial and automotive plants in Northern Italy, we operate throughout the national and European territory.

Thanks to the experience gained, we are able to guarantee our customers a selected product synonymous with high quality and safety; proposing ourselves on the market with a modern commercial structure, mainly aimed at medium and large companies or corporate groups.

Qualified for calls of national interest through the MePA service (electronic market of the Public Administration), we are able to provide:

- hardware and tools artcioli
- equipment and technical items
- industrial and office furniture
- metal shelving for warehouses
- abrasive products
- adhesives and chemicals
- anti-fatigue mats
- accident prevention material
- advanced measuring instruments
- impact barriers for production areas

## Services

### Technical industrial supplies

Sabafer is a company specialized in the resale of high quality brands in the industrial, automotive and aeronautical sectors.

We also operate in the food industry and logistics sector.

After constant growth in the market and years of acquired experience, Sabafer also offers a brokerage and technical-commercial consultancy service for the brands represented.

Thanks to a consolidated experience, the result of years of work carried out with passion and dedication, the company is the market leader in its sector.

We can boast a highly qualified staff, made up of a team of industry experts, constantly updated on innovation and on market news.

We cover the whole of our country on a commercial level and with our vast assortment of stock we guarantee to satisfy any request in the shortest possible time.

For any information about our products and services, or to request a personalized quote, do not hesitate to contact us.

## ABC Premium Partner

Professional hand tools

2019 opens with a very important agreement between Sabafer Srl and ABC Tools Spa, European leader in the tooling market.

This solid union is strategic for Sabafer Srl and ABC itself, as it allows us to expand our sales network and to propose ourselves as a leader in the distribution of high quality work tools.

Tanto lavoro e poche storie.  
Solo le migliori.

ABC Tools and Sabafer share the same ethical principles and final objectives: we are people who work with constancy and great passion, determination, will and trust in themselves and in the Company.

For us, being close to the customer does not only mean satisfying needs, reducing distances and times: in addition to technical preparation, availability and friendliness are also essential elements of the service. Our sales staff confirm this every day.

This is why flexibility is a natural aspect of our character, it allows us to give quick and always personalized answers. It is our mission.

## Shockproof Barriers

### Internal security solutions of industrial plants

A long experience and constant research and development studies have allowed us to conceive innovative and technologically advanced products.

The pursuit of excellence and differentiation in every detail has contributed to the design of new fastening systems using a new generation of technopolymers. This new evolution makes it possible to tackle any safety issue.

Sabafer designs and manufactures newly designed impact protection systems with the aim of preserving your facilities and protecting your staff.

Our products are the ideal solution for securing all industrial areas, both internal and external, to prevent the transit of forklifts or heavy vehicles from putting operators, machinery, shelving or the structural elements of the factories at risk.

Sabafer provides a complete and extremely accurate service: from design, to production, assembly, testing and after-sales assistance.

# Industrial shelving

## Structural solutions for logistics and earthquake safety

Thanks to our experience and our technical know-how, we guarantee you complete solutions for the manual and automatic handling and storage of load units such as cartons / crates, pallets / metal cages, maximizing the use of space and guaranteeing efficiency at the same time. and high performance.

Is logistics a science or an art? Or both?

What is certain is that today it presents itself with an unprecedented complexity, truly unthinkable until a few years ago.

It is no longer just an activity of managing the flow of goods within the production departments of companies, but it has become a crucial aspect of company life because performance and competitiveness on the market are also measured from there.

Today you say logistics and you necessarily think of a thousand new words that revolve around it: automation, integration, efficiency, flexibility, customization, cost optimization and much more.

## Industrial Furniture

A system for your order

A wide range of products intended for professional customers who require total quality, versatility and a contemporary design.

An offer addressed to the most varied production and research sectors: mechanical, electronic, railway, aerospace, car repairs, but also to vocational schools, universities and laboratories.

Furthermore, thanks to an accurate design in lines and colors, we introduce our products to the world of more contemporary and innovative furniture.

Professional and architectural studios, lofts, computer garages are the main recipients of a new way of furnishing, which uses metal for a more technical and contemporary image.

The possibility of combining the wide range of laminated woods with metal enriches the offer and use of drawer cabinets also in the creation of sales counters for shops of various product types.

# Measurement tools advanced

## Measuring instruments Testo

Are you looking for easy-to-use measuring systems for your application?

Testo offers customers ideal measuring instruments for everyday use in various applications for both industry and trade. At the forefront. Fast. Reliable. We are creating truly innovative measuring technology for our customers around the world.

Testo offers you the ideal measuring instrument for any measurement or complete measuring systems.

The new universal instrument for measuring environmental parameters testo 400 and its wide range of precision probes have been developed with one goal in mind: make carrying out all the measures in the sector of ventilation and air conditioning systems easier and faster than ever.

From today, with the testo 400 you can carry out all those operations that were previously only possible with a software and a PC, directly on site and with a single measuring instrument!

The more complex the measurement, the more the measurement assistant integrated into the instrument will help you in the configuration, execution and analysis of the results.
